The **Common Good** Party

NO MORE TALK OF BREXIT!

The EU is a great project aimed at building lasting peace for all in Europe after centuries of war and tyranny. It's achieved a lot. It takes time. We are still needed in the team. The Union is good for our neighbours. It's good for us. Stick with it!
Un-invoke Article 50!

A NEW SPIRIT IN THE COUNTRY

There's lots of stuff that needs doing in the world to make it a better, fairer place for everybody. Getting stuck into the job of resolving difficult global problems will transform us. We'd have a unifying sense of national purpose. We'd be doing things we really believe in.

Doing a good job as a whole nation is the way to earn a decent living and to having money in the national coffers – which we haven't at the moment! We've been living on debt for years

- Children will be keen to learn so as to be a valued member of our purposeful nation
- Old people will retire, satisfied to have done something that really counts

Britain used to be a world power. Now we can do even better - we can have a deeply healthy world influence for **The Common Good**.

Election Communication Birmingham Edgbaston Constituency
Promoted by Rev Dr Richard Rodgers FRCS of Common Good party

I spent 6 weeks in a mock prison cell in the Bull Ring in 1986 to persuade the Soviets to release a young poetess Irina from prison camp. Brummies helped me and rejoiced at her release.

I'm a Christian clergyman and former orthopaedic assistant surgeon in Birmingham. I've spent many years campaigning - for happier times in Russia and then to stop a civil war in Sudan.

In 2004 I founded the Common Good party, to help our own nation find the direction and unity we need. This is my 8th election.

Rev Dr Dick Rodgers

POLICIES

PRIVATISATION: I want to turn back the tide of privatisation to have a nation of people keen to work because they want the whole national project to succeed.

With an inspiring spirit, our national life will work and we'll be more equal.

THE BANKS: I want to make the nation's money the property of the nation not an interest-bearing debt to the banks - a deep problem that hurts our whole life. It makes houses unaffordable.

It starves industry of investment. Citizens must understand this distortion at the heart of our national life. See: positivemoney.org

HEALTH: Establish the NHS on a public service - not a commercial model - including elderly care.

CREATING A NATION THAT WORKS FOR THE COMMON GOOD:

Nationalise the railway, modernise it, cut the fares. Abolish student fees.

Elected Regional government for the regions of England like the EU constituencies. Infrastructure in public ownership - especially tidal power generation.

An effective and well-funded industrial policy. Use our influence on the world stage to nurture a fairer world system. A national network of hiking/cycling barns/campsites at £2-ish per night as the Danes have, so we can enjoy our beautiful land.

**I WANT BRITAIN TO LIVE LIKE A FAMILY AND WORK LIKE A TEAM.
