Petition to Mr Richard Burden MP

We don’t think commercial banks should be allowed to create of our nation’s money which is then their property with all of us having to hire it from them at interest. There’s no reason why they should enjoy this immense privilege. Please ask the Chancellor to make the Bank of England to sole creator of new money which would be an asset of the nation rather than of the banks. And please ask the Treasury Select Committee to work for this change also. July 2013
