

# Let's stay IN the EU

## We are needed

The EU is a good project aimed at building a peaceful, democratic society in the whole of Europe where people have enough to live on and can bring up their children in peace and without fear... people whose families have endured generations of the most appalling horrors that we in Britain can hardly imagine.

*If we think we can bury our heads in the sand and cut ourselves off from disasters on the continent, we have short memories. What's bad for Europe is bad for us. On the other hand, as part of a healing continent, we can thrive and enjoy life together with our continental friends, neighbours and colleagues.*

The EU's not perfect. There's lots to do to make it more democratic and better for ordinary people. But if we're serious and humble we can do a lot as part of the team.

## Some of these continentals are quite nice people!

We are a country that needs a challenge. We should get stuck in and do our bit to make Europe (including the UK) a really lovely place to live and work and a place from which to be a great influence for good in a hurting world.

# Vote Remain

in the European Referendum on Thursday 23<sup>rd</sup> June
