

Don't go!

The world needs Britain

We should be passionate about making the world a better place.

Britain needs the Scots

You're a key part of the team in this noble endeavour. Please stay.

Scotland has a vital role in the betterment of the world and that's better done as a valued part of the UK.

Agreed we've made a mess of UK politics of late but we can do better. Please stay and make it happen.

We need elected regional government of the English North West, North East, West Midlands, etc and not just Scotland. Other EU nations are ordered like that.

If you leave, the rest of the UK will be humiliated on the world scene. That will harm our ability to play a constructive role in a needy world re Islamism, corporate greed, Russian and Chinese assertiveness, German sole dominance in Europe, global poverty, a perverted world monetary system in hock to banks.

If you go, we'll have a permanent Tory Government of England with even less real political debate and alternative than at present. That will be bad for us and will affect you even if you separate.
